INDEPENDENT AUDITORS' REPORT

Members of the Fire Association District Board Sunfield, Sebewa and Danby Fire Association District Eaton and Ionia Counties, Michigan

We have audited the accompanying financial statements of the governmental activities and each major fund of the Sunfield, Sebewa and Danby Fire Association District, Michigan, as of and for the year ended March 31, 2005, which collectively comprise the Fire Association District's basic financial statements as listed in the table of contents. These basic financial statements are the responsibility of the Sunfield, Sebewa and Danby Fire Association District's management. Our responsibility is to express an opinion on these basic financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As discussed in Note I, the financial statements present only the Sunfield, Sebewa and Danby Fire Association District Fund (a special revenue fund) and is not intended to present fairly the financial position and results of operations of any of the participating municipality's, in conformity with accounting principles generally accepted in the United States of America.

Sunfield, Sebewa and Danby Fire Association District Independent Auditors' Report Page Two

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities and each major fund of the Sunfield, Sebewa and Danby Fire Association District, Eaton and Ionia Counties, Michigan, as of March 31, 2005, and the respective changes in financial position for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

As described in Note IV(c), the Sunfield, Sebewa and Danby Fire Association District has implemented a new financial reporting model, as required by the provisions of GASB Statement No. 34, Basic Financial Statements and Management's Discussion and Analysis for State and Local Governments, as of March 31, 2005.

The financial statements referred to above do not include the Management Discussion and Analysis, which is required supplementary information and should be included in order to conform with accounting principles generally accepted in the United States of America.

San E Tandelle, CAR, PC

Sunfield, Sebewa and Danby Fire Association District Notes to Financial Statements March 31, 2005

I. Summary of significant accounting policies

The financial statements of the Sunfield, Sebewa and Danby Fire Association District (the Fire Association District) have been prepared in conformity with U.S. generally accepted accounting principles (GAAP) as applied to government units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. The more significant of the Fire Association District's accounting policies are described below.

A. Reporting entity

The Townships of Sunfield, Sebewa and Danby organized the the volunteer fire department at a meeting on July 9, 1941. New by-laws were adopted and bound by a resolution signed by each municipality effective February 3, 1986. It is now called the Sunfield, Sebewa and Danby Fire Association District. It was established for the purpose of furnishing fire protection throughout the Township of Sunfield, including the Village of Sunfield, the Township of Sebewa, and a portion of the Township of Danby.

The Fire Association District's administrative board consists of five members who are appointed by the Townships and the Village of Sunfield; Sunfield and Sebewa each have two members, on a three year staggered term, a president and secretary/treasurer. This board appoints a fire chief for a term of three years staggered with the officers of the board.

B. Government-wide and fund financial statements

The government-wide financial statements (i.e., the statement of net assets and the statement of activities) report information on all of the nonfiduciary activities of the Fire District. For the most part, the effect of the interfund activity has been removed from these statements. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support. The Fire Association District has no business-type activities.

The statement of activities demonstrates the degree to which the direct expenses of a given function are offset by program revenues. *Direct expenses* are those that are clearly identifiable with a specific function. Program revenues include 1) charges to customers or applicants who purchase,

use or directly benefit from the goods, services or privileges provided by a given function and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function. Taxes and other items not properly included among program revenues are reported instead as general revenues.

Separate financial statements are provided for governmental funds and fiduciary funds, even though the latter are excluded from the government-wide financial statements. The Fire Association District has no responsibility for any fiduciary funds. Major individual governmental funds are reported as separate columns in the financial statements.

C. Measurement focus, basis of accounting and basis of presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provided have been met.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the Fire Association District considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences are recorded only when a payment is due.

Property taxes, interest and charges for services are susceptible to accrual. Other receipts and taxes become measurable and available when cash is received by the Fire Association District and are recognized as revenue at that time.

The Fire Association District reports the following major governmental funds:

The special revenue fund is the Fire Association District's primary operating fund. It accounts for all financial resources of the Fire Association District.

The debt service fund accounts for the resources accumulated and payments made for principal and interest on long-term general obligation debt of governmental funds.

Private-sector standards of accounting and financial reporting issued prior to December 1, 1989, generally are followed in the government-wide financial statements to the extent that those standards do not conflict with or contradict guidance of the Governmental Accounting Standards Board.

As a general rule the effect of interfund activity has been eliminated from the government-wide financial statements.

Amounts reported as program revenues include 1) charges to customers or applicants for goods, services, or privileges provided, 2) operating grants and contributions, and 3) capital grants and contributions, including special assessments. Internally dedicated resources are reported as general revenues rather than as program revenues. Likewise, general revenues include all taxes.

D. Assets, liabilities, and net assets

1. Deposits and investments

The Fire Association District's cash and cash equivalents are considered to be cash on hand, demand deposits, short-term investments with original maturities of three months or less from the date of acquisition.

State statutes authorize the Fire Association District to invest in bonds and other direct and certain indirect obligations of the U.S. Treasury; certificates of deposit, savings accounts, deposit accounts, or depository receipts of a bank, saving and loan association, or credit union, which is a member of the Federal Deposit Insurance Corporation, Federal Savings and Loan Insurance Corporation, or Nation Credit Union Administration, respectively; in commercial paper rated at the time of purchase within the three highest classifications established by not less than two standard rating services and which mature not more than 270 days after the date of purchase. The Fire Association District is also authorized to invest in U.S. Government or federal agency obligation repurchase agreements, bankers' acceptances of U.S. banks, and mutual funds composed of investments as outlined above.

The Fire Association District Board has designated one bank for the deposit of Fire Association District funds.

2. Capital assets

Capital assets, which include property, plant, and equipment are reported in the government-wide financial statements. Capital assets are defined by the Fire Association District as assets with an initial individual cost of more than \$500 and an estimated useful life in excess of one year. Such assets are recorded as historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend asset lives are not capitalized.

Property and equipment of the Fire Association District is depreciated using the straight-line method over the following estimated useful lives:

Buildings	40 years
Office equipment	5 years
Fire trucks, pumpers, trailers	20 years
Vehicles	5 years
Minor equipment	5 years

3. Compensated absences

The Fire Association District does not have a compensated absence policy.

Long-term obligations

In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities statement of net assets.

In the fund financial statements, governmental fund types, recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

5. Fund balance

In the fund financial statements, the unreserved fund balances for governmental funds represent the amount available for budgeting future operations. The reserved fund balances for

governmental funds represent the amount that has been legally identified for specific purposes or indicates that a component of assets does not constitute "available spending resources". The designated fund balances for governmental funds represent tentative plans for future use of financial resources.

6. Use of estimates

The process of preparing general purpose financial statements in conformity with generally accepted accounting principles requires the use of estimates and assumptions regarding certain types of assets, liabilities, revenues, and expenditures. Such estimates primarily relate to unsettled transactions and events as of the date of the financial statements. Accordingly, upon settlement, actual results may differ from estimated amounts.

II. Stewardship, compliance and accountability

A. Budgetary information

Annual budgets are adopted on a basis consistent with generally accepted accounting principles for all governmental funds. All annual appropriations lapse at fiscal year end.

The Fire Association District follows these procedures in establishing the budgetary data reflected in the financial statements:

- 1. Management submits to the Fire Association District Board a proposed budget for the fiscal year commencing on April 1st. The operating budget includes proposed expenditures and the means of financing them. The level of control for the budgets is at the functional level as set forth in the combined statement of revenues, expenditures and changes in fund balances - budget and actual - GAAP basis general funds.
- Public hearings are conducted to obtain taxpayer comments.
- 3. Prior to March 31st, the budget is legally adopted by the Fire Association District Board as a resolution pursuant to the Uniform Budgeting and Accounting Act (P.A. 621 of 1978). The Act requires that the budget be amended prior to the end of the fiscal year when necessary to adjust appropriations if it appears that revenues and other financing sources will be less than anticipated or so that expenditures will not be in excess of original estimates. Expenditures shall not be

made or incurred, unless authorized in the budget, or in excess of the amount appropriated.

- 4. Management is authorized to transfer budgeted amounts between major expenditure functions within any fund; however, these transfers and any revisions that alter the total expenditures of any fund must be approved by the Fire Association District Board.
- 5. Formal budgetary integration is employed as a management control device during the year for the special revenue fund.
- 6. The budget as presented, has not been amended.

B. Excess of expenditures over appropriations

During the year ended March 31, 2005, the Fire Association District incurred expenditures in the capital outlay activity which were in excess of amounts appropriated by \$158,780.

III. Detailed notes on all funds

A. Deposits and investments

At year-end, the carrying amount of the Fire Association District's deposits were \$149,462 and the bank balance was \$149,462, of which \$149,462 was covered by federal depository insurance.

B. Capital assets

Capital asset activity for the year ended March 31, 2005 was as follows:

	Beginning <u>Balance</u>	Increases (Decreases)	Ending Balance

IV. Other information

A. Risk management

The Fire Association District is exposed to various risks of loss related to property loss, torts, errors and omissions and employee injuries (workers compensation). The Fire Association District has purchased commercial insurance for these types of claims. Settled claims relating to commercial insurance have not exceeded the amount of insurance coverage in any of the past three years.

B. Pension Plan

The Fire Association District does not provide a pension plan for its employees.

C. Implementation of new accounting standard

As of and for the year ended March 31, 2005, the Fire District implemented GASB Statement Number 34 - Basic Financial Statements -and Management's Discussion and Analysis - State and Local Governments. The more significant changes required by the standard include a Management Discussion and Analysis; government-wide financial statements, prepared using the economic resources measurement focus and the accrual basis of accounting; fund financial statements, consisting of a series of statements that focus on a governments' major funds; and schedules to reconcile the fund financial statements to the government-wide financial statements.

COMMENTS AND RECOMMENDATIONS

1107 East Eighth Street Traverse City, Michigan 49686 (231) 946-8930 Fax (231) 946-1377

Members of the Board of Directors Sunfield, Sebewa and Danby Fire Association District Eaton and Ionia Counties, Michigan

Our examination was made in accordance with generally accepted auditing standards and, accordingly, included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

It was not necessary to make any comments or recommendations.

This letter supplements the information in the Financial Statements and Notes to Financial Statements. It is intended solely for the use of management and the Fire Association District Board and should not be used for any other purpose.
